A. THE KENTUCKY STATE REVOLVING FUND INTENDED USE PLAN

1. INTRODUCTION

The Federal Water Pollution Control Act of 1956 provided a strong role for the federal government in the construction of publicly owned wastewater treatment works. The amendments enacted in 1972, commonly referred to as the Clean Water Act, expanded the level of federal aid and increased the federal grant share to 75 percent. This was an effort by Congress to speed up the pace of construction of wastewater treatment facilities and eliminate the backlog of needed facilities. However, this was to be only a temporary measure. It was the intent of Congress for states and municipalities to eventually assume full responsibility for financing, building, operating, maintaining, and replacing their treatment facilities.

Congress began to transfer this responsibility to state and local governments when the 1977 Amendments to the Clean Water Act directed the Environmental Protection Agency (EPA) to delegate most of its construction grants management functions to the states. In 1981, the federal role was reduced even more when the annual federal authorization was cut in half. This action reduced the federal grant participation, decreased the number of eligible funding categories, and cut the eligible treatment capacity to that required to meet existing needs.

The Water Quality Act of 1987, which is the 1987 Amendment to the original act, included a schedule and mechanism for completing the transfer of responsibility from the federal government to state and local governments. EPA continued to provide funds for grants to local governments to construct wastewater treatment facilities through federal fiscal year (FFY) 1990. EPA also made grants to capitalize State Water Pollution Control Revolving Funds (SRFs). The object of these funds is to provide loans and other types of financial assistance to communities to build wastewater treatment systems. States were allowed to use part of their annual construction grants allotment to capitalize their respective SRFs beginning with FFY 1987. Also, specific SRF capitalization grants were authorized beginning in 1987. When federal funding ends, the SRF is to be maintained in perpetuity to replace the previous federal participation.

The Kentucky General Assembly enacted House Bill 217 during the 1988 legislative session, which established a State Revolving Fund, the “Federally Assisted Wastewater Revolving Fund,” as an enduring and viable fund. This fund is intended to allow the Commonwealth of Kentucky to qualify for the federal capitalization grants authorized by the federal Water Quality Control Act of 1987. The Commonwealth agrees that the SRF shall be maintained and be available in perpetuity for providing financial assistance, as authorized and limited by the federal Water Quality Act of 1987 and later amendments.

This Intended Use Plan (IUP) is required by federal legislation in Section 606(c) of the Federal Water Pollution Control Act [33 USC 1386(c)]. The IUP serves as the planning document for explaining how the FFY appropriations for the SRF will be used. As currently developed, this IUP identifies the specific projects and activities associated with the federal appropriation for FFY 02, 03, 04 & 05. The IUP must be approved by EPA prior to implementation, and a year end report will also be submitted to EPA for approval.

The Clean Water Act Requirements for an IUP are as follows:

1. A list of those projects for construction of publicly owned treatment works (POTW) on the state's priority list.
2. A description of the short and long term goals and objectives of the state's SRF.
3. Information on the activities to be supported.
4. Assurances and specific certifications for meeting certain requirements of the Capitalization Grant Agreement.
5. The criteria and methods established for the distribution of state revolving funds.

2. SHORT AND LONG TERM GOALS/OBJECTIVES

As required by Section 606(c) of the Federal Water Pollution Control Act [33 U.S.C. 1386(c)], the State is to identify the goals and objectives of its state revolving fund program. The goals as described below are not presented in any priority order.

SHORT TERM GOALS

The state has the following goals and objectives for the state revolving fund program over the short term:

Goal #1: Maintain a self-sustaining revolving loan program through the Kentucky Federally Assisted Wastewater Revolving Fund so as to improve and protect water quality and public health.

Objectives:

- 1.A: Coordinate SRF and enforcement activities.
- 1.B: Coordinate SRF and Watershed Management Framework activities.
- 1.C: Coordinate SRF and the Nonpoint Source Management Program.
- 1.D: Encourage a self-sustaining revolving loan program through state administrative and technical assistance.

Goal #2: Establish and manage an effective and efficient State Revolving Fund Program.

Objectives:

- 2.A: Continue to implement administrative rules and guidance for carrying out the SRF program.
- 2.B: Develop and implement an annual or biennial IUP; and prepare and submit along with the IUP an annual application for the capitalization grant.
- 2.C: Assure compliance with standard operating procedures and policies for managing the SRF program.

- 2.D: Ensure the use of accounting, audit and fiscal procedures that conform with generally accepted government accounting standards.
- 2.E: Ensure the use of the electronic project profile plan.
- 2.F: Develop and submit an annual report to EPA covering the accomplishments of the IUP.

Goal #3: Provide local governments in Kentucky with low-cost financial assistance relative to necessary wastewater facilities.

Objectives:

- 3.A: Ensure the best financing alternatives to local governments.
- 3.B: Encourage and work with local governments to assess financial capabilities and financial alternatives.
- 3.C: Ensure up-front financing for planning and design by establishment of a short term planning and design loan process.
- 3.D: Ensure the best financing alternative to small communities through the Small Communities Outreach Program.

LONG TERM GOALS

The state has the following goals and objectives for the state revolving fund program over the long term:

Goal #4: Ensure compliance by all publicly owned treatment works with state and federal water quality goals.

Objectives:

- 4.A: Develop an SRF priority formula that identifies water quality problem issues and areas and adjusts priorities accordingly.

Goal #5: Provide the best available financial assistance to local governments through the Kentucky Federally Assisted Wastewater Revolving Fund.

Objectives:

- 5.A: Encourage all funding agencies to work together on upcoming projects to put together the best financial package for the community.

Goal #6: Ensure technical integrity of the SRF program through adequate and effective planning, design, and construction management.

Objectives:

- 6.A: Encourage funding agencies to fund only properly planned projects.

Goal #7: Maintain an adequate data management system for tracking and monitoring all SRF projects and program information.

Goal #8: Ensure proper accounting, audit and fiscal procedures conform with generally acceptable government accounting standards.

Goal #9: Promote regionalization of wastewater facilities throughout the Commonwealth in order to make efficient use of SRF funds, combine wastewater systems, prevent new discharges and eliminate package plants, failed septic systems and straight pipe discharges.

Objectives:

9.A: Step up earlier efforts by the Division of Water (DOW) through the initiation of meetings with city and county officials, using the state's Area Development Districts (ADDs) for coordination.

9.B: Select areas for regionalization based on an assessment of projects through facilities planning and information from local officials.

9.C: Maintain a current reporting system to track projects that meets the criteria for regionalization or elimination of straight pipe discharges.

Goal #10: Encourage 100% connection to regional sewer systems to protect the environment and make efficient use of SRF funds.

Objectives:

10.A: Require all applicants for SRF funds to institute a mandatory connection ordinance and to enforce such ordinance to ensure all affected areas are served and regionalization efforts are successful.

Goal #11: Proposed projects shall be accepted into an electronic database in a prescribed manner with sufficient detail of information with which to make a determination of program eligibility.

Goal #12: Expand use of SRF funds to additional point and non-point source uses.

3. CRITERIA AND METHODS FOR DISTRIBUTING FUNDS

The State has developed a Project Priority Ranking System and Project Priority List. This process provides a clear, objective order of ranking wastewater facilities projects in consideration of the following criteria:

1. The relative costs of the project.
2. Elimination or treatment of existing discharges in the sewer system planning area, including onsite treatment discharges, especially of failing septic systems or straight pipes, sanitary or combined sewer overflows, package treatment plants, and POTWs.

3. Prevention of new discharges in planning areas, including from onsite systems, package treatment plants, and POTWs.
4. Regionalization through combinations of sewer systems or extensions of sewer system planning areas into unsewered areas.
5. The impact of pollution from existing discharges on the receiving streams, drinking supplies, and public health.
6. The impact of discharges on environmentally-sensitive areas such as outstanding resource waters and wellhead protection areas.
7. Coordination of projects with the Watershed Management Framework cycles.
8. Operation of existing municipal plants and collection systems.

The rationale for funding projects in an order other than that shown on the priority list shall take into consideration the following:

1. The borrower requests to be bypassed for funding consideration or is bypassed due to failure to submit information within the required time frame; or
2. Project is removed due to initiation of construction; or
3. Borrower is not in compliance with the enforceable requirements of the Water Quality Act of 1987.

4. ASSURANCES AND SPECIFIC CERTIFICATIONS

The State shall provide the assurances and certifications as required by EPA as part of the Operating Agreement. This Agreement is the official document between the Commonwealth of Kentucky and the U.S. EPA setting forth legal responsibilities of each.

Pursuant to Section 606(c)(4) of the Act, the State certifies that:

1. The State will enter into binding commitments equal to at least 120% of each quarterly grant payment within one year after receipt of the payment;
2. The state will expend all funds in the SRF in an expeditious and timely manner;
3. Funds will first be used to assure maintenance of progress toward compliance with enforceable deadlines, goals, and requirements of the Act, including the municipal compliance deadline; and
4. The state will conduct environmental reviews on wastewater facility projects in satisfying the National Environmental Policy Act (NEPA)-like requirements. The state's NEPA-like procedures are attached to the Operating Agreement.

5. ANNUAL REPORT

Section 606(d) requires that the state shall provide an Annual Report to the U.S. EPA. The Annual Report shall be submitted to EPA by September 30 of each year.

This report shall identify loan recipients, loan amounts and terms, similar details on other forms of financial assistance provided from SRF, and other such information as EPA may require.

6. SRF FUNDS AVAILABLE TO BE COMMITTED AND DISBURSED FOR FEDERAL CAPITALIZATION GRANTS FOR FFY2002-05

The following tables summarize funds expected to be available as a result of the Federal Capitalization Grants for FFY02 - FFY05. Total dollar SRF funds available are subject to change based on congressional and legislative action.

SRF Funds Available as a Result of the Federal Capitalization Grants for FFY02

FFY 01 SRF Funds Available	\$	0
Current Year Grant (Title VI FFY02)	\$	16,967,313
Less 4% Administration Fee	\$	(678,693)
State Matching Share	\$	3,393,463
Repayments as of 9/30/01	\$	50,937,664
Repayments Projected During FFY02	\$	16,252,000
Interest Projected During FFY02	\$	1,000,000
Other Income to the Fund	\$	0
Total SRF Funds Available For Projects	\$	87,871,747

SRF Funds Available as a Result of the Federal Capitalization Grants for FFY03

FFY 02 SRF Funds Available	\$	0
Current Year Grant (Title VI FFY03)	\$	16,857,027
Less 4% Administration Fee	\$	(674,281)
State Matching Share	\$	3,371,405
Repayments as of 9/30/02	\$	67,189,664
Repayments Projected During FFY03	\$	17,252,000
Interest Projected During FFY03	\$	1,000,000
Other Income to the Fund	\$	0
Total SRF Funds Available For Projects	\$	104,995,815

SRF Funds Available as Result of the Federal Capitalization Grants for FFY04

FFY 03 SRF Funds Available	\$ 0
Current Year Grant (Title VI FFY04)	\$ 16,857,027
Less 4% Administration Fee	\$ (674,281)
State Matching Share	\$ 3,371,405
Projected Repayments as of 9/30/03	\$ 84,441,664
Repayments Projected During FFY04	\$ 18,252,000
Interest Projected During FFY04	\$ 1,000,000
Other Income to the Fund	\$ 0
Total SRF Funds Available For Projects	\$ 123,247,815

SRF Funds Available as Result of the Federal Capitalization Grants for FFY05

FFY 04 SRF Funds Available	\$ 0
Current Year Grant (Title VI FFY05)	\$ 16,857,027
Less 4% Administration Fee	\$ (674,281)
State Matching Share	\$ 3,371,405
Projected Repayments as of 9/30/04	\$ 102,693,664
Repayments Projected During FFY05	\$ 19,252,000
Interest Projected During FFY05	\$ 1,000,000
Other Income to the Fund	\$ 0
Total SRF Funds Available For Projects	\$ 142,499,815

7. PROPOSED BINDING COMMITMENT AND DISBURSEMENT SCHEDULES FOR FEDERAL CAPITALIZATION GRANTS FOR FFY2002-05

These tables identify the proposed quarterly binding commitment schedules and disbursement schedules for using FFY2002 - FFY2005 SRF Federal Capitalization Grant funds. These payment schedules identify the anticipated amount of federal dollars to be deposited into the SRF.

Proposed FFY02 Schedules		
Quarter	Binding Commitment Amount	Disbursement Amount
October 1, 2001 - December 31, 2001	\$ --	\$ --
January 1, 2002 - March 31, 2002	\$ --	\$ --
April 1, 2002 - June 30, 2002	\$ --	\$ --
July 1, 2002 - September 30, 2002	\$ --	\$ --
October 1, 2002 - December 31, 2002	\$ 967,313	\$ --
January 1, 2003 - March 31, 2003	\$ 1,000,000	\$ 1,000,000
April 1, 2003 - June 30, 2003	\$ 5,000,000	\$ 1,000,000

8. PROJECTS PROPOSED TO BE FUNDED IN FFY2002-05

The following table lists the projects that are being considered for funding with remaining money and the FFY2002 to FFY2005 allotments, based on the FFY2002-2005 Project Priority List. This list contains the combined project costs and priority points for all projects for an applicant that are intended to be funded in each year of this IUP, along with costs summarized by List A, B, or C, and by funding year. Each project in the Project Priority Lists that has a Funding Year other than "Future" is included in this list. This listing of projects is preliminary, based on information available. The projects to be funded will depend on the applicants' ability to meet all requirements of the program. Projects previously funded to date are shown in the next section.

Upon reviewing the projects being considered for SRF funding, the State concludes that none of these will undergo an Environmental Impact Statement (EIS).

FFY2002 \$32,506,603		
List A \$27,117,615		
Mount Sterling Water & Sewer	\$13,202,540	2,232 Priority Points

**B. THE KENTUCKY STATE REVOLVING FUND PROJECT PRIORITY LIST
(ACTIVITIES TO BE SUPPORTED)**

1. THE PRIORITY SYSTEM

The Kentucky SRF priority system is used by the Commonwealth of Kentucky to make decisions regarding which applicants are eligible to receive federal and state funding assistance for the construction of pollution abatement facilities under Title VI of the Federal Clean Water Act, which governs the Clean Water SRF program. The priority system process is comprised of the following elements of the Water Quality Program in Kentucky:

- a. The Continuing Planning Process
- b. Water Quality Management Plans
- c. Survey of Municipal Needs
- d. Individual Facilities Plans
- e. KPDES Permits
- f. Authorization, Appropriation and Allotment of Federal Funds
- g. Project Priority Formula and Project Ranking
- h. Project Priority List
- i. List of Funded Projects
- j. Leveraging/Transfer of Funds

a. The Continuing Planning Process

CPP reports prepared in the past contained overall guidance used by the Commonwealth to make all water quality management decisions. These reports included water quality management plans prepared by DOW and Department management plans. They have involved an assessment of the condition of Kentucky's waters, inventories of pollution sources not in compliance with the goals of the Clean Water Act, and the program necessary to bring pollution sources in compliance with these goals. In that municipal pollution sources are included, and loans are tools used to abate them, the establishment of priorities for allocating dollars for sewer improvements is a part of the continuing planning process.

b. Water Quality Management Plans

In Kentucky these plans have been written as required by Sections 208 and 303 of the Clean Water Act and 401 KAR 5:006. Section 303 plans developed for each of the river basins in the Commonwealth contain specific inventories of point source pollution loads and the degree by which these loads must be reduced to meet the goals of the Clean Water Act. The process of waste load allocation which establishes the degree of treatment that each point source discharge must achieve was a product of this plan. These wasteload allocations continuously performed by the DOW and facilities plan updates approved by the DOW, support or update the plan. Further, the Priority Formula and System were originally developed and implemented in this plan. The Section 208 plan for the State studied non-point pollution impacts to Kentucky streams and assessed the need for program redirection. Kentucky's non-point source management program has been completed and is currently being implemented. The biennial 305(b) report to Congress

summarizes our progress on water quality efforts.

c. *Survey of Municipal Needs*

US EPA conducts a survey of municipal needs for a 20-year planning period. These surveys identify the categorical needs of municipalities for sewage collection, transport, treatment, and system rehabilitation to correct inflow/infiltration and combined sewer overflows. This information is used in the continuing planning process and the priority system and list. These surveys are currently updated every four years for EPA review. EPA tabulates needs on a national basis and reports to Congress for continual SRF Capitalization grants. Listed below is Kentucky's 2000 approved needs (in dollars) and a comparison of the amount of needs shown on this year's priority list to the 2000 Clean Water Needs Survey (CWNS):

Needs Category	Description	2000 CWNS 20-Yr Needs	2002-05 PL	2002-05 PL as % of CWNS
I	Secondary Treatment	\$654,089,000	\$273,271,224	41.8%
II	Advanced Treatment	\$101,390,000	\$95,671,299	94.4%
IIIA	Infiltration-Inflow Correction	\$193,283,000	\$37,713,834	19.5%
IIIB	Major Sewer Rehabilitation	\$279,615,000	\$88,832,220	31.8%
IVA	Collector Sewers	\$755,964,000	\$973,313,662	128.8%
IVB	Interceptor Sewers	\$591,967,000	\$264,603,636	44.7%
V	Combined Sewer Overflows Correction	\$216,819,000	\$17,062,650	7.9%
Totals		\$2,793,127,000	\$1,750,468,525	62.7%

Notes:

2000 CWNS: Kentucky 20-Year Wastewater Infrastructure Needs in federal 2000 CWNS

2002-05 Priority List: Kentucky Wastewater Infrastructure Project Needs in this IUP and Priority List. The 2002-05 Priority List Needs are needs eligible for funding. Needs not funded will remain in subsequent needs surveys.

d. *Individual Facilities Plans*

Once a municipality is identified in the Water Quality Management Plan as having needs to meet the goals of the Clean Water Act, the first step taken is an intensive study of those needs and development of the most cost effective and environmentally sound alternative to address those needs. The product is a Regional Facilities Plan which describes what facilities are needed and an estimate of the costs to construct and operate those facilities. Also included are estimates of individual user costs, local costs and federal assistance required to implement the plan. This information is used to upgrade the data used in the priority list for a project which is not yet funded. Each applicant is responsible for initiating the Regional Facilities Plan. Planning costs and design costs are eligible for funding from the wastewater revolving fund loan. Planning

loans, Sewer System Evaluation Survey (SSES) loans, design loans or planning/design loans are available. Planning, design and SSES loans can be made to List A or List B applicants without regard to position on the priority list.

e. KPDES Permits

The Kentucky Pollutant Discharge Elimination System (KPDES) establishes the legally binding degree of treatment to be achieved by a project in order to meet the goals of the act. This degree of treatment was determined by the water quality management plan using a process called Wasteload Allocation where numerical performance standards are defined for effluent quality for a municipal discharge. This degree of treatment is used in the Facilities Plan to develop the least cost alternative to meet a community's wastewater treatment needs and abate pollution. Once a Facilities Plan has been approved, the effluent limitations are written into the KPDES permit.

f. Authorization, Appropriation and Allotment of Federal Funds

Authorization is the maximum amount of funds which Congress has indicated can be appropriated for loans to municipalities in a given year. Even though an amount is authorized, actual appropriations may be less.

Allotment is the share of the appropriation given to each state. Kentucky's allotment is currently 1.2872% of the federal monies resulting in an estimated \$16,967,313 for FFY2002 and an estimated \$16,857,027 each year for FFY2003-05. The Water Quality Act of 1987 established a "State Water Pollution Control Revolving Fund" commonly referred to as the State Revolving Fund (SRF). Kentucky legislation established the program as the "Federally Assisted Wastewater Revolving Fund".

g. Project Priority Formula and Project Ranking

The project priority formula is a mathematical relationship of variables which were chosen to reflect a project's prevention or abatement of pollution, along with a sewer system or unsewered area's severity of pollution and need for collection, transport, treatment, rehabilitation, and combined sewer overflow correction, relative to other projects. The initial formula was developed and implemented in 1975 as a part of the Kentucky River Basin Plan. This formula was revised in 1983, 1988, 1992, 1998, and again for this 2002-05 IUP. A full description of the most recent formula is in Appendix A to this document. The priority formula considers the following criteria:

1. The relative costs of the project.
2. Elimination or treatment of existing discharges in the sewer system planning area, including onsite treatment discharges, especially of failing septic systems or straight pipes, sanitary or combined sewer overflows, package treatment plants, and POTWs.
3. Prevention of new discharges in planning areas, including from onsite systems, package treatment plants, and POTWs.
4. Regionalization through combinations of sewer systems or extensions of sewer

- system planning areas into unsewered areas.
5. The impact of pollution from existing discharges on the receiving streams, drinking supplies, and public health.
 6. The impact of discharges on environmentally-sensitive areas such as outstanding resource waters and wellhead protection areas.
 7. Coordination of projects with the Watershed Management Framework cycles.
 8. Operation of existing municipal plants and collection systems.

It is the policy of the Natural Resources and Environmental Protection Cabinet to encourage regional solutions to wastewater collection and treatment needs where it is practical to do so. When an applicant is proposing a project that will pump wastewater to a separate regional wastewater treatment plant (WWTP) additional priority points will be assigned to the applicant. This factor encourages and rewards applicants who are willing to cooperate for the greater good of the Commonwealth and their constituents.

Project ranking on the priority project list is accomplished once data has been collected and each project's points are computed. Ranking is accomplished in three groups: eligible sewer systems that are currently serving a population of greater than 3,000 (List A), eligible sewer systems that are currently serving a population of 3,000 or less, including unsewered communities (List B), and nonpoint source projects (List C). These groups of projects will be discussed in the section, "How to Use the Priority List".

h. Project Priority List

The project list is the ranking of projects in order of priority (based on priority points) designating the funds to be made available for the construction of wastewater facilities and the year funding is expected to occur. Projections are made through FFY2005. Other factors considered in determining the funding year for a priority project include a project's ability to proceed and the schedule of fund allocations necessary to complete a large project which must be funded over several years.

i. List of Funded Projects

Projects which have been previously funded with SRF have been placed in a separate listing shown in Section A.9 of this IUP. SRF projects are considered funded when a binding commitment for the loan is received. Other projects are considered funded when construction permits or approvals are issued by the DOW. Applicants having additional needs following funding of the basic project should contact the Cabinet to assure these needs are maintained on the priority list.

j. Leveraging/Transfer of Funds

The authority may transfer up to \$25 million of uncommitted funds from the Clean Water SRF program to the Drinking Water SRF program. In addition, discussions are under way to leverage the SRF moneys.

2. FUNDING FACTORS

The following is a brief overview of important funding factors which impact the list in terms of where funds are targeted for the current fiscal year:

a. Funds

Limited available funds are a major constraint to constructing the facilities necessary for clean water. Kentucky has approximately \$2.8 billion in needs according to the EPA 2000 Clean Water Needs Survey Report. This figure is low considering the fact that most municipalities do not document their needs until: (a) a loan or grant application is being made, (b) an agreed order exists to address violations or pollution prevention measures.

b. Reserves

The Clean Water Act specifically provided selected reserves which further define and allocate the utilization of funds. These reserves are 1% of the total allotment and are retained for water quality management planning under Section 205(j)(1) of the Act.

A 4% reserve fund of \$678,693 from the FFY2002 allotment will be retained for administration of the loan program and \$674,281 from FFY2003-2005.

c. Project Definition

In previous Priority Lists, there was a unique correspondence between projects and discharge locations or wastewater authorities. This Priority List may identify multiple projects for a discharge location or a wastewater authority. An applicant may combine multiple projects into a single loan application.

d. Unable To Establish Points

A request was mailed to all applicants included in the FY2000-01 priority list for the wastewater needs data to be used in calculating the priority points. Project data was also collected by the Kentucky ADDs in association with the Kentucky Infrastructure Authority (KIA). Project data from applicants that responded to the DOW or the KIA along with existing in-house data were used to calculate the priority points that appear on this list. Applicants that did not respond, or responded as anticipating no project in FFY2002-05, were assigned zero priority points for project-specific factors. Their needs will be updated in the appropriate project list and they are still eligible for SRF loans, but at the lowest priority.

Should such a project be shown on the project list and the above is in error, the applicant should submit a written transmittal of the correct data and DOW will revise the project's points on the following list update. If a project does not appear on the list, but has needs, the applicant must supply the DOW with up-to-date data. Data needed to establish points for communities will require a completed Wastewater Project Profile form as shown in Appendix B.

e. Funding of Section 212 Needs Categories

Kentucky intends to fund planning and construction for all needs categories to the extent allowable under Federal Legislation. The categories are:

Category I:	Secondary Treatment
Category II:	Advanced Treatment
Category IIIA:	Infiltration/Inflow Correction
Category IIIB:	Major Sewer System Rehabilitation
Category IVA:	New Collector Sewers and Appurtenances
Category IVB:	New Interceptor Sewers and Appurtenances
Category V:	Correction of Combined Sewer Overflows
Category VI:	Storm Water Control

One requirement for receipt of funding for collector sewers is that the applicant have in effect an ordinance or other legally enforceable requirement that all sources of domestic waste connect to the new collector sewer system when it becomes available.

f. Funding of Expanded Uses

Nonpoint source (NPS) pollution is the primary pollution source for approximately two-thirds of the stream miles and three-quarters of the lake acres in Kentucky that are water quality impaired. Unlike point source pollution, which enters our waters at definite locations such as discharge pipes from wastewater treatment plants, NPS pollution originates from numerous, diffuse sources from activities such as agriculture, construction, land disposal, forestry, and hydrologic/habitat modifications. NPS pollutants such as sediment, nutrients, bacteria, pesticides, and chlorides are carried by stormwater runoff and leachate into nearby surface and groundwater bodies and can result in water quality degradation.

The federal Water Quality Act of 1987 allows States which have adequately addressed their point source sewage treatment facility needs to use funds from their SRF to address NPS pollution. Specifically, State SRF programs may provide assistance in the form of loans, loan guarantees, bond insurance, or refinancing of existing debt for the implementation of U.S. EPA approved State Nonpoint Source Management Programs as required under Section 319 of the 1987 Water Pollution Control Act amendments.

The Kentucky Nonpoint Source Assessment Report was developed and approved by the U.S. EPA in 1988. The most current update includes data contained in the 1998 305(b) Kentucky Report to Congress on Water Quality and is entitled Kentucky Nonpoint Source Assessment Report (March, 1999)(Kentucky Division of Water).

The Kentucky Nonpoint Source Management Program - 2.0 (Kentucky Division of Water, 2002) which was approved by EPA, lists specific activities for controlling the nonpoint source pollution impacts identified in the NPS Assessment Report and identifies responsible implementing agencies and potential/available funding sources.

In Kentucky, on-site wastewater disposal activities, urban, and agriculture are the three primary causes of NPS stream-use impairment (Kentucky Nonpoint Source Assessment Report, 1999). Federal cost-share funds and state loan programs are available to assist farmers with remediation of agricultural NPS pollution problems. Regulatory mechanisms exist for addressing a majority of the coal mining, petroleum extraction, and urban water quality problems. However, very little assistance is currently available for land-owners to remediate pollution problems from on-site wastewater disposal activities.

Kentucky's priority for SRF expanded uses is to provide assistance for repairing or replacing failing or substandard on-site wastewater disposal systems, and for urban runoff and stormwater control measures that are consistent with the Kentucky Nonpoint Source Management Program. List C contains the NPS activities priority list.

The SRF may provide assistance in the form of loans, loan guarantees, bond insurance, or refinancing of existing debt for the implementation of best management practices (BMPs) or other NPS pollution control initiatives that are identified in the EPA-approved Kentucky Nonpoint Source Management Program. Loans may be made to local governmental entities and/or ADDs, which will then provide funding to private individuals who will participate in the governmental agency's Management, Operation, and Maintenance program. Repayments from homeowners to local governmental entities, ADDs, and/or banks will provide the SRF source of loan repayment.

g. Rates and Terms of Loans

All loans shall be repayable over a period not to exceed 20 years from the date the project initiates operation, with the exception of short term planning, design and SSES loans.

The rate of interest on each loan shall be established at the applicable offer rate at the time the conditional commitment is made. The conditional commitment letter is a letter delivered to the borrower giving KIA's commitment to provide a loan conditional on certain actions by the borrower on or before the pre-closing date. Such commitment will be made upon presentation of the bid tabulation and the Authority's satisfaction that the project proposed is financially feasible, the applicant is credit worthy and NREPC's assurance that the project will comply with all technical requirements of state and federal environmental laws and regulations.

The Authority shall establish interest rates annually based on prevailing market conditions, availability of funds and funding demand. The Executive Director of the Authority shall recommend rates to the Authority Board of Directors for approval. The rate of interest on each loan shall be set forth in the conditional commitment letter. If the nature of a wastewater project financed by the Authority's loan caused interest on any Authority bonds issued to fund the wastewater project to become taxable, the Authority may consider adjustments in the interest rate to reflect the additional costs of Authority funds.

h. Actual Project Funding

Actual project funding may vary from that shown on the project list, due to updated cost estimates and funding received from other sources. Increases to loans must be approved prior to

the date of initiation of operation. In the event a project is scheduled for funding and is unable to complete an application, the agency may bypass the scheduled project to fund lower priority projects. These lower priority projects (including all projects with zero points) may be funded if priority projects experience delays in completing planning or design, are unable to commit local funding, or have technical issues which cannot be quickly resolved.

As long as the eligible sewer system or unsewered community appears on the Priority List, any project for that sewer system or community is eligible for SRF funding even though the specific project to be funded may not be listed. The actual applicant for SRF loans must be a city, county, or other legal governmental agency.

The division received comments after the draft of this Intended Use Plan was issued requesting that NPDES stormwater control activities be funded with the SRF. There was not enough time to request and receive specific stormwater control projects for inclusion in the final Intended Use Plan, but as long as an eligible sewer system is included on the Priority List then any eligible storm water projects may be funded.

i. Refinancing

The KIA is generally opposed to refinancing existing SRF loans due to the lowered return to the revolving fund over time. However, the Authority is willing to consider certain hardship cases where the following criteria are met:

1. The borrower can prove that the existing rates are causing a financial hardship on the users in the system in the funded project.
2. The burden imposed on the users by virtue of such rates is placing the repayment of the original loan in question.
3. The governmental agency can show significant savings as a result of the refinancing.
4. The governmental agency can identify an environmental problem within its jurisdiction which it is willing to immediately address with the savings achieved through the refinancing.
5. Projects must meet all federal and state requirements.

The Authority is also willing to accept governmental agency requests that the refinancing of projects be on the Priority List; provided, however, that such refinancing from SRF monies will be assigned low priority and only recommended to the board when no other higher ranking projects are ready for consideration. Refinancing projects will be considered by the Authority only when all the following criteria are met:

1. There are sufficient funds available in SRF to meet all other identified project needs for the program year.
2. The applicant can show significant savings as a result of the refinancing.
3. The applicant can identify an environmental problem within their jurisdiction which they are willing to immediately address with the savings achieved through the refinancing.

4. Projects must meet all federal [40 CFR 35.3120(b)] and state (200 KAR 17:050) requirements.

3. HOW TO USE THE PRIORITY LIST

For assistance in finding a specific project on the Priority Lists, the Alphabetical Project List shows the sewer system or unsewered community's name in alphabetical order with project names for all projects, the total priority points for each project, the rank of the project on its respective list and the list on which the project may be found.

The tables that follow the Alphabetical Project List show the three Project Priority Lists with projects in ranked order. Sewer systems will be on List A if the population currently served by the existing facility is more than 3,000. Sewer systems with served populations of 3,000 or less and unsewered communities are on List B. Nonpoint source qualifying activities and projects are on List C. The following information is given for each project on the Project Priority Lists:

a. *Priority Rank*

The project's rank in the list.

b. *Priority Points*

The number of points assigned the project from the priority list formula.

c. *Sewer System and Project Name*

The name of the sewer system or unsewered community in which the project is located, or the applicant sponsoring the project, and the name of the project. The sewer system or applicant must be a city, county, or other legal governmental agency.

d. *County*

The county in which the project is located.

e. *Watershed*

The watershed/river basin in which the sewer system planning area or project is located.

f. *Loan Number*

An identifying number assigned to each applicant by the DOW at the time the applicant is first included on the Priority List.

g. KPDES Number

The number of the sewer system's KPDES discharge permit, or "new" if the project is for an unsewered community.

h. Needs Number

An identifying number in the Clean Water Needs Survey for needs in this sewer system.

i. Project Number

An identifying number assigned to each project. This is assigned by either the ADD Water Coordinator at the time the project is submitted to the Water Resource Information System (WRIS), or the DOW at the time the project is included on the Priority List.

j. Funding Year

The federal fiscal year in which funding is planned. Beyond FFY2005 the planned funding year will be called Future. Projects with a funding year of 2002-2005 are included in the applicable year's section of the To Be Funded list in section A.8. of this IUP.

k. Binding Commitment Date

The proposed date on which the State will enter into a binding commitment to provide an SRF loan. The binding commitment is made by KIA upon completion of planning requirements, approval of plans and specifications, bidding and presentation of a bid tabulation and tentative award resolution.

l. Construction Start Date

The date placed in the Notice To Proceed telling the contractor to begin construction of the project.

m. Initiation of Operation

The date the constructed facility initiates operation as certified by the project consultant. Principal repayments begin within 12 months of this date.

n. First Payment

The first interest payment (except for refinancing) is due on June 1 or December 1 immediately following the date of the initial draw, but shall not be less than three months from the initial draw.

o. Federal and State Loan Amounts

The federal and state shares of the loan amount. The state share must be at least 20 percent of the federal share.

p. Total Project Cost

The total project Needs Category costs eligible for SRF funding. Also the total of the state and federal shares of the loan amount.

q. Project Cost by Needs Category

The project costs eligible for SRF funding broken down into the respective EPA Needs categories. Projects for treatment of backwash water from water treatment plants are eligible and are classified as treatment projects under Needs Categories I and II. A project may have zero costs if the project is for planning only and does not have any construction costs in any Needs category.

5. LIST C - NONPOINT SOURCE PROJECTS

Qualifications for List C:

Only legal or governmental authorities may apply for SRF funds.

Eligible Projects:

- 1) Publicly-owned On-site and Decentralized treatment projects
- 2) Setting up a Management, Operation, and Maintenance (MOM) program for a responsible authority (regional wastewater authority, city, county, or other utility)
- 3) Setting up and funding a responsible authority's loan program to fund privately-owned onsite and decentralized treatment projects that participate in the authority's MOM program.
- 4) Stormwater management program and control measures for NPDES Storm Water Phase I and II which are consistent with the Kentucky Nonpoint Source Management Program 2.0

Priority Order:

Priority for funding is based on priorities for TMDL development in the 2002 *303(d) List of Waters for Kentucky* report.

- Level I Projects that impact streams listed on Tables 2 (TMDLs In Progress) and 3 (First Priority) or lakes on Tables 5 (TMDLs In Progress) and 6 (First Priority) of the 303(d) list which have nutrients and pathogens as the pollutants of concern.
- Level II Projects that impact streams listed on Table 4 (Second Priority) and lakes on Table 7 (Second Priority) of the 303(d) list which have nutrients and pathogens as the pollutants of concern.
- Level III All stormwater management and control projects
- Level IV All other onsite and decentralized treatment projects.

6. Summarized Costs by County

County	# Projects	Total Costs	County	# Projects	Total Costs
Adair	1	\$0	Henderson	26	\$31,165,000
Allen	2	\$1,222,000	Henry	2	\$4,395,328
Anderson	3	\$5,732,000	Hickman	3	\$3,627,890

Tennessee River	130	\$129,507,920
Tradewater River	40	\$54,640,621
Tygarts Creek	10	\$2,344,800
Upper Cumberland River	48	\$232,350,163

THIS PAGE INTENTIONALLY LEFT BLANK

APPENDIX A

PRIORITY FORMULA FOR LISTS A & B

THIS PAGE INTENTIONALLY LEFT BLANK

PRIORITY SYSTEM FORMULA FOR LISTS A AND B

Qualifications for List A:

Population—The population currently served by the sewer system is greater than 3000.

Only legal or governmental authorities may own, operate, maintain, and manage the sewer systems.

Qualifications for List B:

Population—The population currently served by the sewer system is less than or equal to 3000, or the project is in an unsewered community .

Only legal or governmental authorities may own, operate, maintain, and manage the sewage systems.

Eligible Projects:

Activities for treatment plants and collection systems that meet the definitions in Section 212 of the Federal Water Pollution Control Act [33 U.S.C. Section 1292]

Priority Order:

Highest to lowest priority points calculated from the following formula. Separate rankings for Lists A and B.

1. Priority Points (PP)

$$PP = NF \times PF$$

Where: **PP** = Priority Points

NF = Needs Factor

PF = Project Factor

Note: In order to receive points for the various factors, the proposed project must address the needs related to these factors. Some factors pertaining to existing collection systems or treatment plants may have zero points if the community is unsewered.

2. Needs Factor (NF)

$$NF = \frac{4.0C_1 + 3.0C_2 + 2.5C_3 + 2.0C_4 + 1.5C_5 + ORF + DWF + DPF + REG + MPR + WHPF + SWPF}{C_1 + C_2 + C_3 + C_4 + C_5 + 42}$$

Where:

C₁ = **Treatment cost.** The amount of project cost for adding or modifying treatment (EPA Needs Categories I and II) in millions of dollars.

C₂ = **Interceptor sewer cost.** The amount of project cost for construction of interceptors (EPA Needs Category IVB) in millions of dollars.

C₃ = Infiltration/inflow correction and major sewer rehabilitation costs. The amount of project cost for I/I correction or sewer rehab (EPA Needs Categories IIIA and IIIB) in millions of dollars.

C₄ = Combined sewer overflow cost. The amount of project cost for correction of combined sewer overflows (EPA Needs Category V) in millions of dollars.

C₅ = Collector sewer cost. The amount of project cost for construction of collector sewers (EPA Needs Category IVA) in millions of dollars.

ORF = Outstanding resource water factor. Assigned a value of 1 if the sewer system's planning area contains an outstanding state resource water, an outstanding national resource water, or a high quality water. Otherwise, **ORF** = 0.

DWF = Drinking water factor. Assigned a value of 1 if the existing POTW discharge, or a community's straight pipes (i.e., raw sewage discharges), or a community's onsite systems (e.g. septic systems) cause a documented impact on drinking water supplies. Otherwise, **DWF** = 0.

DPF = Documented Pollution Factor (Watershed Factor in the Plan of Study) Assigned a value of one, if stream degradation from improper sewage disposal systems or treatment can be documented with any of the following:

- 1) The stream is listed as "Not Meeting Uses" in the latest Kentucky 305(b) Report to Congress on Water Quality.
- 2) The applicant submits bacterial test results per 401 KAR 5:031 Section 6(1)(a) to document that the stream is "Not Meeting Uses".
- 3) Other documentation approved by the Division of Water.

Otherwise, **DPF** = 0.

REG = Regionalization Factor. Assigned a value of 0.5 for each of the following items. Otherwise **REG** = 0:

- 1) If the project will prevent new discharges, from point sources or waste treatment nonpoint sources.
- 2) If the wastewater authority proposes to extend sewer service to areas outside its jurisdictional boundaries.

MPR = Municipal Performance Rating. Assigned a value ranging from 0 to 42 depending on facility inspections during the previous year. For sewerred applicants with no existing treatment facility, the average value of all facilities will be used.

WPHF =Wellhead Protection Factor. Assigned a value of 1 if the planning area lies within or is coincident with a WHPA-2 (the area which represents a 10-year time of travel or the entire spring basin recharge area of a groundwater source drinking water supply) of a wellhead protection area approved by the Division of Water. Otherwise, WHPF = 0.

SWPF =Surface Water Protection Factor. Assigned a value of 1 if the proposed project is in the basin management unit that is in year four or five of the basin management cycle on day 1 of the IUP cycle. Otherwise, SWPF = 0.

3. **Project Factor (PF)**

$$PF = ST + (FST \times 1.5) + (SP \times 2.0) + FAC + LOD + INFI + INFO + SSO + CSO + MWPP$$

Where:

ST = Septic Tank Factor. Number of households utilizing properly operating septic tank systems to be eliminated by this project.

FST = Failing Septic Tank Factor. Number of households utilizing failing septic tank systems to be eliminated by this project.

SP = Straight Pipe Factor. Number of households utilizing straight pipe discharges to be eliminated by this project.

FAC = Facilities factor. The pollution impact of the existing municipal treatment plant(s) on the receiving stream as calculated by the following equation.

$$FAC = 8.34 \times Q_{dmr} \times [(BOD_5) + (1/2 \times SS) + (3.0 \times NH_3N)] \times EFLFAC$$

Where:

Q_{dmr} = Annual average flow reported to the Division of Water per Discharge Monitoring Reports (DMRs).

BOD_5 =The difference between the annual average biochemical oxygen demand concentration reported on the facility's self-monitoring reports and the KPDES permit monthly average concentration for biochemical oxygen demand in mg/liter. Seasonal limits will be averaged. $BOD_5 = 0$ if STP is meeting its permit limit.

SS = The difference between the annual average suspended solids concentration reported on the facility's self-monitoring reports and the KPDES permit monthly average concentration for suspended solids in mg/liter. $SS = 0$ if STP is meeting its permit limit.

NH₃N =The difference between the annual average ammonia nitrogen concentration reported on the facility's self-monitoring reports and the KPDES permit monthly average concentration for ammonia nitrogen in mg/liter. Seasonal limits will be averaged. NH₃N = 0 if STP is meeting its permit limit.

EFLFAC = 1.0 when discharging to a water quality limited stream segment, 0.33 when discharging to an effluent limited stream segment.

LOD =Load Factor. The number of points allowed for the elimination of existing wastewater treatment plants by this project.

$$\text{LOD} = [\text{Sum of } Q_{\text{pcap}}(s)] \times 1000$$

Where:

Q_{pcap} = The permitted daily average capacity of a wastewater treatment plant in million gallons per day (MGD) from its KPDES permit.

INFI =Infiltration factor. A factor which assesses groundwater that indirectly enters a collection system. INFI = 0 for unsewered communities.

$$\text{INFI} = \text{GPCD}_{\text{avg}} - 120; \text{ when } \text{GPCD} > 120$$

Where:

$$\text{GPCD}_{\text{avg}} = (Q_{\text{dmr}} - Q_{\text{ind}})/\text{Pop}$$

Q_{ind} = Current industrial flow in the collection system. **Q_{ind}** may also include prison, institutional and commercial flows.

Pop = Current population served by the collection system.

Otherwise, **INFI** = 0.

INFO =Inflow Factor. A factor which assesses storm water that directly enters a collection system. INFO = 0 for unsewered communities. Maximum value of INFO =1100.

$$\text{INFO} = \text{GPCD}_{\text{max}} - 275; \text{ when } \text{GPCD} > 275$$

Where:

$$\text{GPCD}_{\text{max}} = (Q_{\text{max}} - Q_{\text{ind}})/\text{Pop}$$

Q_{max} = The maximum 24 hour flow reported to the Division of Water per the Discharge Monitoring Reports (DMRs).

Otherwise, **INFO** = 0.

SSO = Sewer System Overflow. An unpermitted bypass or overflow in a collection system. A value of 50 will be assigned for each recurring sewer system overflow point to be eliminated by this project.

CSO = Combined Sewer Overflow. A permitted bypass or overflow in a collection system. A value of 50 will be assigned for each permitted bypass or overflow point to be eliminated or to receive treatment by this project.

MWPP = Municipal Water Pollution Prevention. A value assigned to an existing POTW which is hydraulically loaded to 80% or greater of its daily permitted capacity.

MWPP = $(Q_{\text{dmr}}/Q_{\text{pcap}} \times 100)$; when $Q_{\text{dmr}}/Q_{\text{pcap}} \geq 0.8$.

- c. _____

7 Special Impact(s) of Proposed Water/Wastewater Project:

- a. New service/improved service to _____ unserved households
 _____ underserved households
- b. Number of jobs: _____ new/retained
- c. Other beneficial technical, managerial, fiscal impacts: (20 words or less) _____

- d. Rate impact/reasonableness of cost: _____

- e. If proposed extension of service to existing homes is related to public health protection, please describe the source water quality and availability: _____

8 Median Household Income of Service Area: _____

9 Project Start Schedule: Years 0-2 _____ Years 3-10: _____ Years 11-20: _____

10 Estimated Funding Sources:

TABLE 1: ESTIMATED FUNDING (\$1,000)							
	Total	SRF Amount Water	SRF Amount Wastewater	CDBG Amount	RD Amount	Other (name)	Other (name) Amount
0-2 Years							
3-10 Years							
11-12 Years							
TOTAL							

11 Project Data - Wastewater (check/complete all items which apply to your project)

Watershed: _____

Modifications to treatment plant
 Current treatment capacity (design): _____
 Treatment capacity (design) after project: _____

_____ Collector sewer (linear feet/size/material) _____

_____ Interceptor sewer (linear feet/size/material) _____

_____ Sewer Rehab (linear feet/size/material) _____

_____ Management (describe): _____

Does your agency currently provide sewer service: yes _____ no _____

_____ This project will prevent new discharges

_____ This project will extend sewer service outside of the applicant's existing planning area
 or jurisdictional boundaries

Total Estimated Project Cost (wastewater): \$ _____

TABLE 2: FLOW DATA										
Service Area	Population Served (No. of persons)	Average			Average Design Flow (MGD)	GPCD Average (GPCD)	Peak Daily			
		Total Flow (MGD)	Industrial Flow (MGD)	Commercial Flow (MGD)			Peak Daily Flow (MGD)	Industrial Flow (MGD)	Commercial Flow (MGD)	GPCD Peak (GPCD)
Current										
0-2 Years										
3-10 Years										
11-20 Years										

TABLE 3: COST (\$1,000)										
	Category							Total Categories I-V Per Period	Operations and Maintenance	Category VII D NPS Urban
	I	II	III A	III B	IV A	IV B	V			
	Secondary Treatment	Advanced Treatment	I/I Removal	Sewer Rehab	Collector Sewers	Interceptor Sewers	Combined Sewer Overflows			
0-2 Years										
3-10 Years										
11-20 Years										
TOTAL (\$1,000)										

TABLE 4: NEEDS							
	Public Health Concerns Eliminated			Total No. of WWTPs to be Eliminated		Overflow Points to be Eliminated	
	Number of Raw Sewage Discharges	Number of Failing Septic Systems	Septic Systems to be Eliminated	Total No. of WWTPs to be Eliminated	Total Average Design Flow from Eliminated WWTPs (MGD)	Total No. of SSOs to be Eliminated	Total No. of CSOs to be Eliminated
0-2 Years							
3-10 Years							
11-20 Years							
Total 20 Year PA							
KPDES No. of WWTP to be Eliminated	Name of WWTP to be Eliminated	Latitude (in decimals)	Longitude (in decimals)	Planning Period to be Eliminated	Average Design Flow (MGD)		

I acknowledge and affirm that the preliminary project data and information provided herein captioned as a Water/Wastewater Project Profile is accurate to the extent of my knowledge, and the submission of same to agencies of the United States Government and the Commonwealth of Kentucky as a planning document represents an official act of the _____ (agency) in seeking the implementation of said project, as so authorized.

Submitted this: _____ day of _____, 200__

Project Title: _____

Authorized Official: _____ (typed name)

_____ (signature)
